

Once you are logged in as Administrator in WHMCS you need to set a Server:

Servers

Add Server

Name	<input type="text" value="OGP Server 1"/>
Hostname	<input type="text" value="example.com"/>
IP Address	<input type="text" value="66.77.88.99"/>
Assigned IP Addresses (One per line)	<div></div>
Monthly Cost	<input type="text" value="60"/>
Datacenter/NOC	<input type="text" value="MyDataCenter Ltd."/>
Maximum No. of Accounts	<input type="text" value="200"/>
Server Status Address	<input type="text"/>
	To display this server on the server status page, enter the full path to the server status folder (required to be
Enable/Disable	<input type="checkbox"/> Disable Server

Nameservers

Primary Nameserver	<input type="text"/>	IP Address:	<input type="text"/>
Secondary Nameserver	<input type="text"/>	IP Address:	<input type="text"/>
Third Nameserver	<input type="text"/>	IP Address:	<input type="text"/>
Fourth Nameserver	<input type="text"/>	IP Address:	<input type="text"/>
Fifth Nameserver	<input type="text"/>	IP Address:	<input type="text"/>

Server Details

Type	<input type="text" value="Ogp"/>
Username	<input type="text" value="myogpadminlogin"/>
Password	<input type="password" value="••••••••"/>
Access Hash (Instead of password for cPanel servers)	<div></div>
Secure	<input type="checkbox"/> Tick to use SSL Mode for Connections

Save Changes

Then you need to create a group, and add this server to the group:

Servers

Create New Group

Name

OGP servers

Fill Type

☒ Add to the least full server

☐ Fill active server until full then switch to next least used

Selected Servers

Add »

« Remove

Open OGP and go to administration -> servers to find out the remote server id:

At bottom you can see a list of the remote servers installed:

DashboardDSiGame MonitorFTPShopTS3 AdminUtilAdministrationdiefemphpMy

Add New Remote Host

A remote host is a server where the OGP agent is running on. Each host can have multiple number of IP addresses on which users can bind servers to.

Remote Host:

The remote host must be a pingable hostname!

Remote Host Port:

The port that is listened by the OGP agent on remote host. Default: 12679.

Remote Host Name:

Remote host name is used to help users to identify their servers.

UNIX user:

User name where agent is running. Example: Jonhy

FTP port:

The FTP server port for the current agent.

Remote Encryption Key:

Remote encryption key is used to encrypt the data between the webpages and the agent. This key must be some in both ends.

Time Out:

Seconds. The time limit to get response from this agent.

Use NAT:

Activate if your remote server is using NAT rules.

Add Remote Host

Configured Remote Host

ID#: 1	Server Name: local	Agent Status: Online	[Delete] [Edit] [View log]
--------	--------------------	----------------------	----------------------------

Now back to WHMCS and edit the module of your product, go to the module tab of your product and fill the required settings:
